Future Electronics, founded by Robert Miller in 1968, recently celebrated the 11th anniversary of its Memphis Area Distribution Center (MADC).

Online PR News - 07-January-2016 - Pointe Claire, Quebec Future Electronics, a global leading distributor of electronic components, recently celebrated the 11th anniversary of the company’s Memphis Area Distribution Center in the US.

Future Electronics was founded in Montreal in November of 1968 by Robert Miller, President. Today the company is recognized as one of the most respected and innovative companies in the industry. The Memphis Areas Distribution Center, known as the MADC, is a world class facility that was officially opened and became fully operational in October 2004, after Robert Miller invested $52 million to build the most sophisticated, state-of-the-art distribution system in the world.

The decision to establish its main distribution facility in Southaven, Mississippi, located within close proximity to all major carrier hubs, has proven to be a tremendous success for Future Electronics, enabling an impressive 99.5% on-time delivery rate throughout the Americas and beyond - an unprecedented and unrivalled achievement anywhere else in the industry.
