Global Vision To Spotlight New Quality Control Platform At Drupa 2016

The Quality Control Platform is the fastest way to find and eliminate errors on packaging

Online PR News - 05-May-2016 - Global Vision will be showcasing its all-in-one Quality Control Platform at drupa 2016, offering intuitive tools for inspecting text, graphics, Braille, and barcodes. The Quality Control Platform is designed to help printers and pre-media companies ensure accuracy, traceability and achieve uniform packaging quality throughout workflow while reducing artwork rework cycles, errors, and associated costs.

Join the Global Vision team at drupa, Messe Düsseldorf, May 31 - June 10, booth #E20 Hall 7A.

"With the Quality Control Platform, we are providing the entire quality control process for packaging in one place," said Mike Malz, Creative Director at Global Vision. "We are excited to help usher in a new era of quality control that will help shift companies away from unreliable manual methods, but most importantly give the confidence that packaging is accurate when it reaches the customer."

We are excited to help usher in a new era of quality control that will help shift companies away from unreliable manual methods, but most importantly give the confidence that packaging is accurate when it reaches the customer.

Product highlights at drupa 2016

All-in-One Quality Control Platform
In response to significant and growing demands for web-based proofreading technologies, visitors to the Global Vision booth can see demonstrations of its Quality Control Platform. This solution is ideal for the high demands of the printing and packaging market looking to ensure the accuracy of their client's text and artwork for their clients.

Scanproof - Print Inspection
Docuproof - Text Inspection
Artproof - Graphics Inspection
Barproof - Barcode inspection
Brailleproof - Braille Inspection
Spellproof - Spelling Inspection

Leader in quality control technologies for 25 years
