Robert Miller Congratulates Team on New Distribution Agreement with ERP Power

Robert Miller, President of Future Electronics, praised his team on the recent completion of the company’s new global distribution agreement with ERP Power.

Online PR News - 25-September-2017 - Future Electronics, a global leading distributor of electronic components, recently announced a new global distribution agreement with ERP Power.

Robert Miller, President of Future Electronics, recognized his team members for their efforts in completing the new global distribution agreement, which will further expand the company's huge portfolio of electronic components and products for its global customer base.

ERP Power designs and manufactures energy-efficient LED driver power electronics for architectural, commercial, and industrial applications. Headquartered in Moorpark, CA, ERP own and operates its own ISO 9001 certified manufacturing facility to ensure quality of design, sourcing, production and testing.

The high power density of ERP’s drivers results in power supply sizes that are 20+% smaller than that of the competition, thus giving engineers the ability to design lighting fixtures without concern regarding the size of the power supply. ERP drivers are programmable to deliver supply chain efficiency savings by enabling a single power supply to be used across multiple fixture designs, by tuning the output parameters to specific LED array requirements. ERP drivers can also integrate with a variety of sensors - over wired or wireless connections - acting as a backbone for access to Internet of Things (IoT) applications.

Future Electronics' success is largely based on its commitment to develop and maintain strong partnerships with suppliers and customers, along with the strength of its commercial and technical competencies through all stages of the design-production cycle.

Founded in 1968 by Robert Miller, Future Electronics is the third largest component distributor in the world and is the only one with a globally integrated IT infrastructure.

For more information about Future Electronics and access to the world’s largest available-to-sell inventory, including industry-leading products from ERP Power, visit: www.FutureElectronics.com.

About Future Electronics

Future Electronics is a global leader in electronics distribution, ranking 3rd in component sales worldwide, with an impressive reputation for developing efficient, comprehensive global supply chain solutions, as well as providing differentiated engineering services encompassing technical support, technology training and custom board design. Founded in 1968 by Robert Miller, President, Future Electronics has established itself as one of the most innovative organizations in the industry today, with 5,500 employees in 169 offices in 44 countries around the world. Future Electronics is globally integrated, with one worldwide IT infrastructure providing real-time inventory availability and access, while enabling full integration of its operations, sales and marketing worldwide. Offering the highest level of service, the most advanced engineering capabilities and technical solutions through all stages of the design-production cycle, and the largest available-to-sell...
inventory in the world, Future's mission is always to Delight the Customer®.
